How It Works

RECYCLABLE

Choose a recyclable product your consumers can feel confident using.

ENHANCED ANAEROBIC LANDFILL BIODEGRADATION*

Break down occurs in an anaerobic landfill environment. *according to ASTM D5511

DISPOSABLE

After use of BioEPS Silver Liner separate the reflective film from the insulation for proper disposal in your trash. This aids in rate of biodegradation.**

ENVIRONMENTALLY FRIENDLY

BioEPS products are used in their final state, providing long-term benefits. for our planet.

CLEAN RELIABLE ENERGY

Microbes consume BioEPS via organic biodegradation, producing humus and biogas for clean reliable energy.
